

Please do not allow my traditional fair-use rights to space shift and time shift publicly broadcast television be taken away by Hollywood moguls.

I am also deeply concerned that, with the broadcast flag, all audio/visual technical development we have to be "approved" by Hollywood. This will bring innovation to a standstill. Remember that Hollywood fought against the VCR - comparing it to the Boston Strangler - and look how good and profitable of a product it was!

Sincerely,
Christa Schommer
